Release Note v117.0.9

This document will update you on some of the most amazing updates in [Electron POS v117.0.9](#)

POS updates

1. New design for payment types on billing screen :

- We have introduced a similar UI for the additional payment type, available to both keyboard and touch-screen POS users.

Generate Bill

Table N: Bill No: KOT No:

☐ Delivery ☐ Pick Up ☒ Dine In

Cafe Table No. C7 View Kot Assign to: Persons:

Mobile: Enter min. 10 digit no. Name: Enter name

Add: Enter address Enter locality

Item Special Note

Save Delivered Save & EBill Reset KOT KOT & Print Hold

2. Improved printer assignment view :

- You can now assign items or categories to specific printers with greater clarity, thanks to the new and improved grid view.

Assign Printer - Arpit

Note: Entire category or specific items within that category are assigned to a different printer.

☐ All Categories (0 Categories Assigned, 0 Items Assigned)

Selecting All Categories (including items) will assign all existing and future categories to the printer.

☐ Strawberry Pastry Slice		
☐ Vanilla Pastry Slice		
☐ White Forest Cake		
☐ Egg Biryani		
☐ Non Veg		
☐ Soups		
☐ Uttapam		

Activate Windows Go to Settings to activate Windows.

Cancel Save

3. Auto food ready configuration enhancement :

- Previously, the auto food ready functionality applied the same preparation time for "All days". You can now configure it day-wise with separate time settings for each day.

The screenshot shows the 'Online Order Configuration' window for Petpooja POS. The 'Auto Mark Food Ready' tab is active. A notification banner at the top states: 'Enable Auto Food Ready to instantly streamline your workflow. It's the perfect solution for fast-paced kitchens and pre-packed menus.' Below this, a section titled 'Update all your outlets at once. Keep every outlet synchronized with a single click.' contains three radio buttons: 'All Days', 'Daywise' (selected), and 'Auto MFR Off'. Under 'Set Daywise auto mark food ready time:', there are dropdown menus for each day of the week (Sun, Mon, Tue, Wed, Thu, Fri, Sat), each currently set to 'Select Min'. A 'Save' button is located to the right of these dropdowns. Below the day settings, there are checkboxes for various services: 'Select All' (checked), 'Zomato' (checked), 'Swiggy' (checked), 'Whitelabel' (checked), and 'Paytm' (checked). To the right of the 'Whitelabel' and 'Paytm' checkboxes, there are buttons labeled 'All Days - 1 mins'. A 'Close' button is in the top right corner of the configuration area. The left sidebar contains navigation options: Billing, Dine In, Pick Up, Delivery, KOT, Reports, Live View, Day End, Settings, Check Updates, and Logout. The top right corner has a 'Call for support 07969 223344' button and a 'Back' button.

- By default this configuration will be set to "All days".

4. Advance order enhancements :

- You can now view a detailed bifurcation in the executive summary and order summary reports, showing :
 - Orders with bill numbers (Invoice summary)
 - Orders with memos (Memo summary)
 - Previously due order amounts received today (Due received summary)

Sample of Executive summary report :

Advance Order Summary	
Advance Order (Invoice Summary)	
Count:	2.00
Today Received Amount:	1994.01
Total:	2022.01
Advance Order (Memo Summary)	
Count:	11.00
Cash:	485.47
Card:	0.00
Other:[BHARAT PAY]	51.00
Other:[Google Pay]	3.00
Other:[ICICI PAY]	200.00
Remaining:	1372.89
Total:	2512.87
Advance Order (Due Received Summary)	
Cash:	0.00
Card:[CRED CARD]	50.00
Card:[INTERNATIONAL CORAL CARD]	29.35
Card:[MASTER CARD]	211.00

5. Minimum advance order amount collection :

- You can now set a minimum advance order amount for creating offline advance orders from the POS.

Advance Order

Select Date: 2025-08-12 Hours: 21 Minutes: 15

Total (₹) 647.33 Paid (₹) 0 Remaining (₹) 647.33

Payment Options: ☒ Cash ☐ Card ☐ Other Advance amount: 0

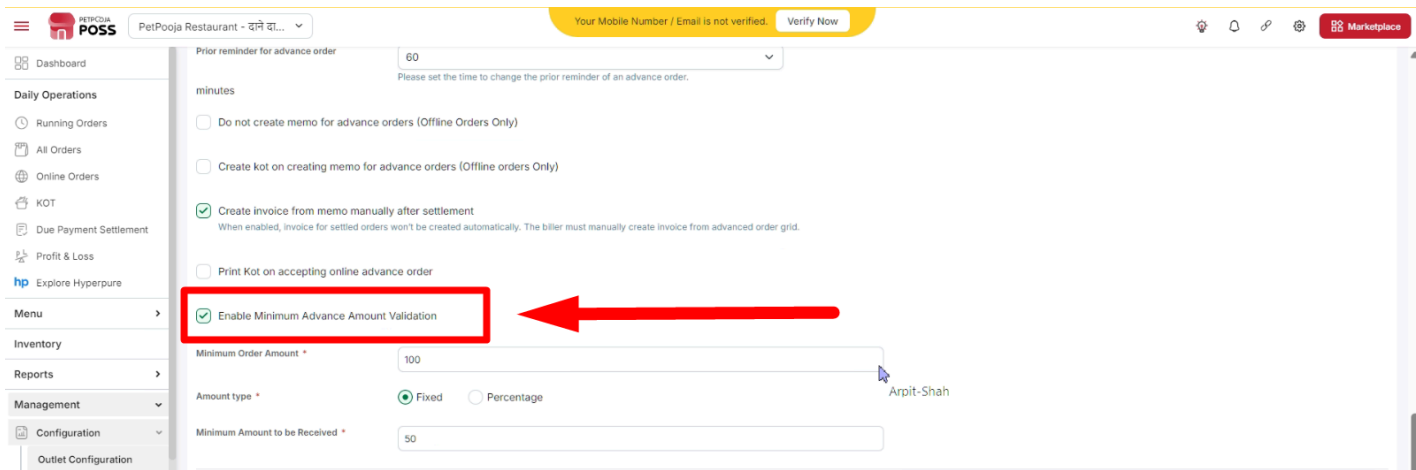

⚠ The minimum advance amount should be ₹50.

Customer Note

Note : If a bill is printed after 9 days or if a bill is printed before the advance order/delivery date, consumption will not be recorded.

Buttons: Cancel, Save, Save & Print, Save & EBill

- This setting is fully configurable, and by default, there will be no such minimum amount validation applied.
- Path to configure : Owners dashboard → management → configuration → outlet configuration → online/advance order → online/advance order configuration → [advance order setting](#)

6. Bugs and Fixes :

- We've made minor enhancements related to the POS reports' design.

Marketplace service updates

1. Captain application :

- Your captain will now receive a notification for every successful payment made by customers via the Dynamic QR code printed on the bill.
- You can now accept or reject Swiggy Dine-in QR code orders directly from the Captain application.

2. Token Display application :

- We have enabled a new configuration in your TDS application that allows you to choose whether to display the bill number or KOT number on the TDS dashboard. However, in the case of dine-in orders, the TDS dashboard will always display the kot number (token number).
- Additionally, we have introduced a workflow that lets you configure whether to announce the KOT number or bill number during the “food ready” event in your TDS application.

3. KDS application :

- Your kitchen staff can now view item images on the Windows KDS, if the images have been added from the POS. This feature supports delivery, pickup, and advance orders.
