Electron POS - Release Note v119.0.1

This document will update you on some of the most amazing updates in [Electron POS v119.0.1](#)

POS updates

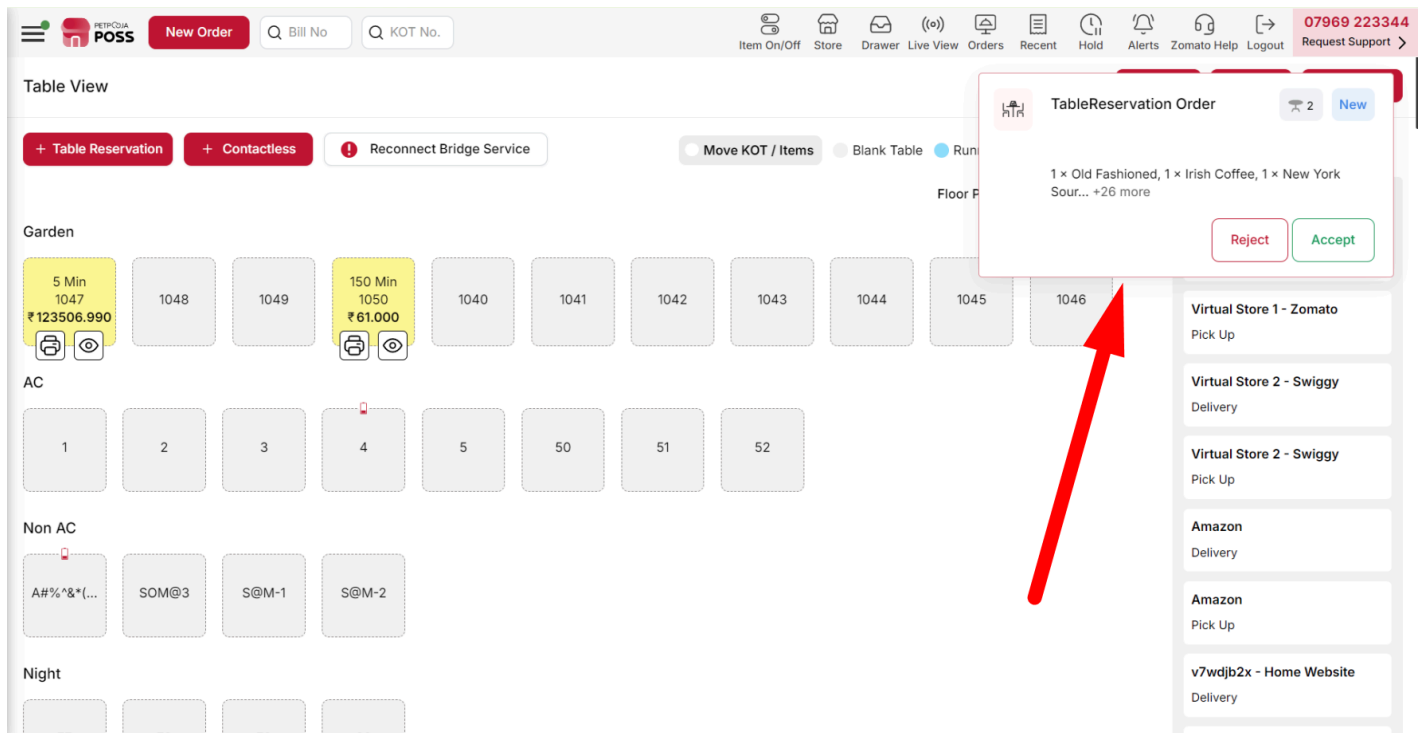

1. Customer Remarks option in POS

- A new option has been added under the Customer Details section in the POS. Users can now enter remarks against each customer detail while billing.

2. TRM order acceptance enabled on POS and Captain app

- Improved Order Acceptance Flow in POS & Captain. For restaurants with reservation integrations and queue ordering, now easily accept or reject customer orders placed while they wait in queue, streamlining operations and enhancing service.

3. KOT update for Table-shifted items

- Whenever a KOT item is moved from one table to another, a new KOT will be printed for the shifted item, and the KOT label will display “Shifted.”
- Shifted KOT Sample :

Duplicate

4. Support for Swiggy Toing orders

- Petpooja now supports orders from Swiggy's new 'Toing' platform. Easily identify and manage these orders in your reports, expanding your online presence with this latest delivery channel.

5. Rider unassigned status on Zomato orders

- Stay updated in real-time with notifications on POS when a rider is unassigned, helping your staff respond promptly to order fulfillment changes.

6. Swiggy Dine-In QR item On/Off API integration

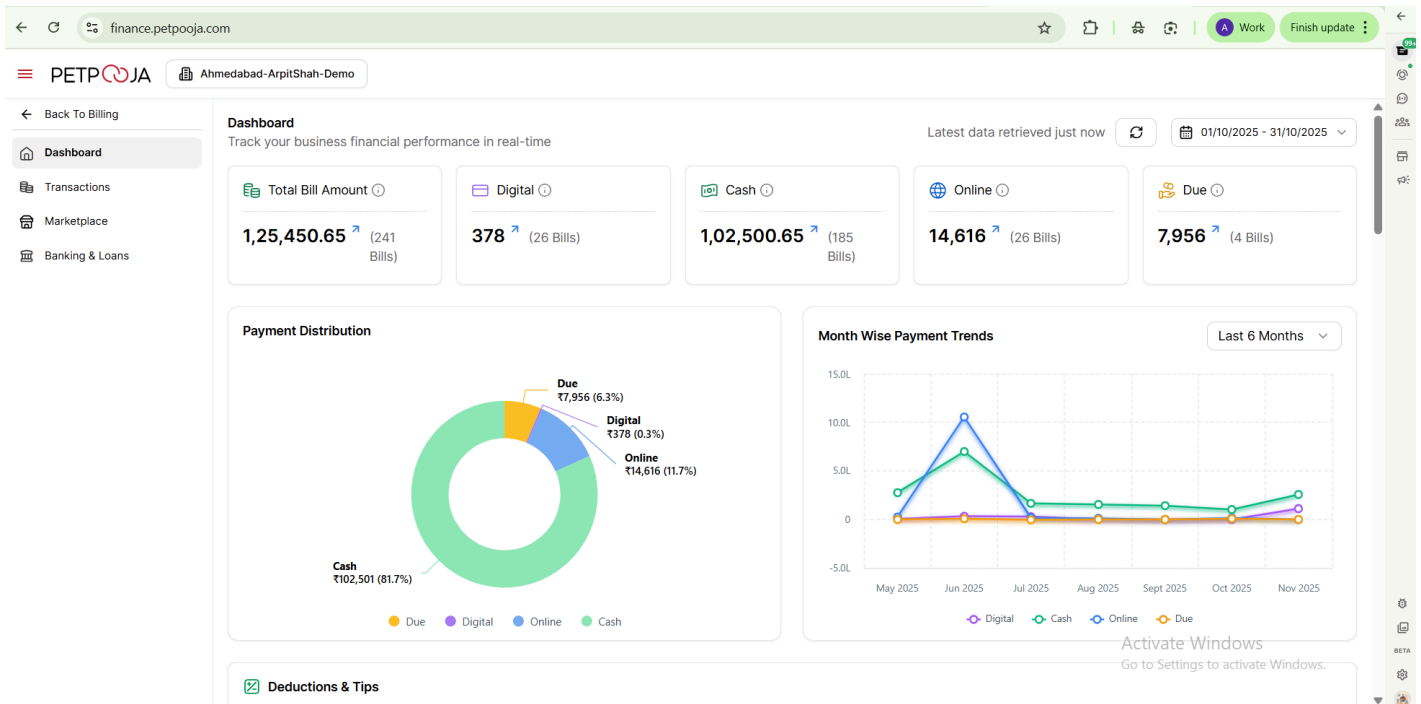

- Empower your restaurant to control item availability dynamically on Swiggy's dine-in QR ordering platform, updating menu options instantly.

Owner's Dashboard updates

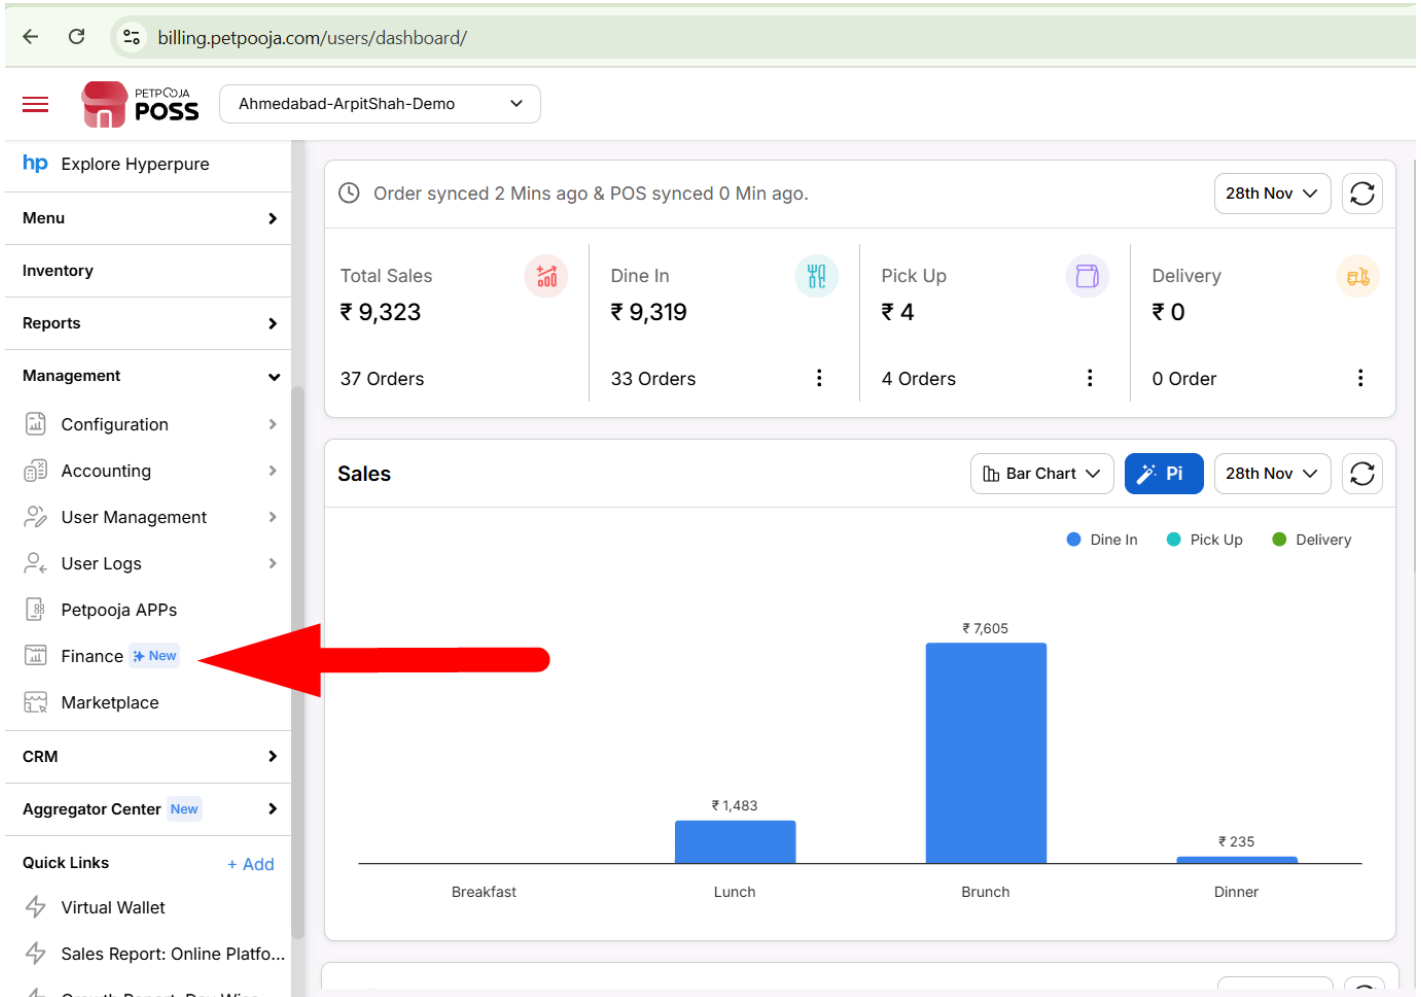

1. Introduction of Petpooja Finance

- We're glad to share that our new product, Petpooja Finance, is now live across all regions in India.

- [Petpooja Finance](#) gives you a clear view of their financial performance and payment insights through a single dashboard. This update is designed to make it easier to track daily finances, reduce manual reconciliation, and understand payouts and deductions with better accuracy.

Navigation : Owners dashboard → management → [Finance](#)

Upcoming Enhancements

In the next phase, we will be introducing :

- **Banking integrations** for real-time account-level visibility
- **Loan and credit integrations** to help merchants track active facilities, repayments, and eligibility for new credit lines
- **P&L visibility** on finance portal

2. Settings for the Locality-based Delivery charges

- We have introduced a new option that allows you to manage locality-wise delivery charges for your POS orders.
- Please note that this configuration applies only to offline orders and does not affect any online orders.
- **Configuration path** : Owners dashboard → configuration → outlet configuration → [area/locality wise delivery charges](#)

3. Simplified QR code downloading for Dine-in QR code

- Simplify QR Code Management with Area-Wise Download. Filter and download dine-in menu QR codes by specific dining areas or suborder types. Perfect for multi-area restaurants, this feature reduces setup confusion and accelerates area-specific QR deployment.

4. Day-wise category scheduling

- Schedule menu categories to appear at different times on different days for both online and offline sales—perfect for optimizing menu variety and availability.

5. Zomato packing charges guardrails

- We now enforce Zomato-approved packing charges, ensuring compliance and seamless integration with Zomato's guidelines—no more discrepancies in packing fees.

6. Expanded delivery partner options in Grubtech integration

- Outlets connected with Grubtech can now accept orders from new delivery partners, including Careem, Deliveroo, Noon, Smiles, and Keeta, broadening your digital reach.

7. Addon item images on Talabat platform

- Enhance your online menu by uploading addon images for Talabat orders, making addon offers more enticing and boosting customer engagement.

8. Customer visibility of staff-added orders in Dine-In QR

- Customers ordering via Dine-in QR can now see items added by restaurant staff or captains before requesting the bill, enhancing transparency and order accuracy.
-
