Release Note v122.0.1

This document will update you on some of the most amazing updates in [Electron POS v122.0.1](#)

POS updates

1. Bill/KOT Print Page Enhancement

- **New Feature**
 - Popup added when items are **not assigned to any KOT printer**
- **Capability**
 - **User Can:**
 - View unassigned items
 - Select printer and assign
- **Impact**
 - Prevents missed KOT printing & Improves operational clarity

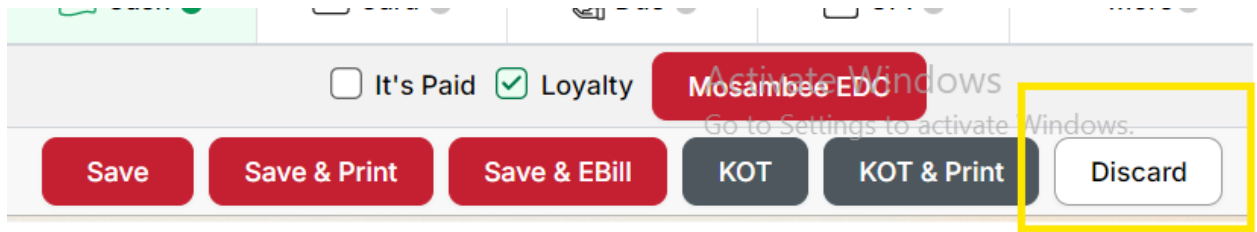

2. HOLD Order Functionality Improvement

- **Issue**
 - Held orders were **getting removed unintentionally** when user exited after resuming
- **Enhancement**
 - Hold order will now persist unless user performs:
 - Save Order
 - Send to Kitchen (KOT)
 - Discard Order
 - Added **Discard Button** in billing screen

- **Impact**

- Prevents accidental order loss
- Better control during busy operations

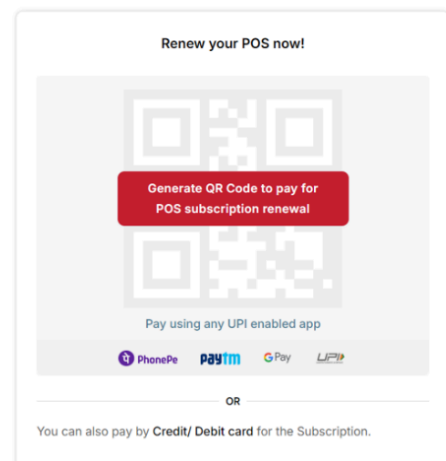

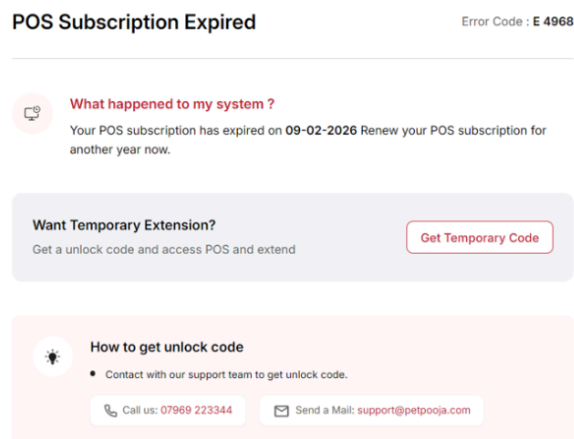

3. POS Lock Screen Update (Suspended State)

- **Changes:**

- Updated messaging when POS is in Suspended Mode

- **New Message:**

- Expiry < 90 days: User is directed to the Payment/Renew screen.

- Expiry > 90 days: User will see the Subscription Suspended screen.

- **Impact:**
 - Clear communication to users
 - Controlled access behavior

4. Connectivity Improvement (Android - UDP Based Solution)

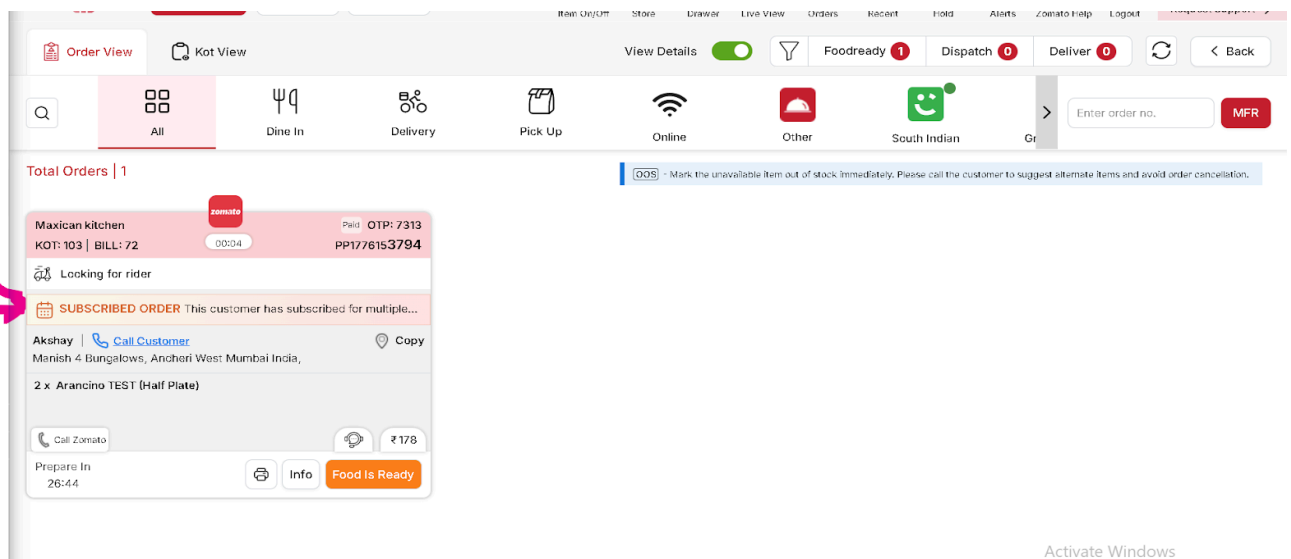

- **Enhancement:**
 - Introduced UDP-based mechanism to handle IP change in main server
- **Background:**
 - Earlier mDNS solution was unreliable across routers
- **Impact:**
 - Improved app connectivity stability
 - Reduced disconnection issues when IP changes

5. Advance Orders – Bypass “After Print Modification” Restriction

- The “**After Print Modification**” configuration will no longer apply to **Advance Orders**.
- Advance Orders will now:
 - **Bypass** the After Print Modification restriction.
 - Be editable only based on the “**Edit Advance Order**” permission.
- This aligns with the previously implemented logic for “**After Bill Save Modification**”.
- **Impact:**
 - Ensures Advance Orders remain editable post-print when appropriate permissions are granted.

6. Zomato Subscribed Orders Identification

- Orders placed under **Zomato subscription model** will now be clearly identified.
- A “**Subscribed Order**” tag will be displayed on the order card.
- **Impact:**
 - Improves visibility and helps staff quickly identify subscription-based orders.

7. CRM Customer Tag Issue Fix

- **Issue:**
 - Customer tag was removed when:
 - Customer selected via **name search**
- **Fix:**
 - **Tags now persist regardless of:**
 - Name Search
 - Mobile number selection
- **Impact:**
 - Consistent CRM tagging behavior

8. UI Improvements – Day Start Screen

- **Fixes:**
 - Corrected ₹ symbol font
 - Fixed icon color inconsistency in Cash Drawer button
 - Resolved icon alignment issues:
 - Last User

- Day End Time

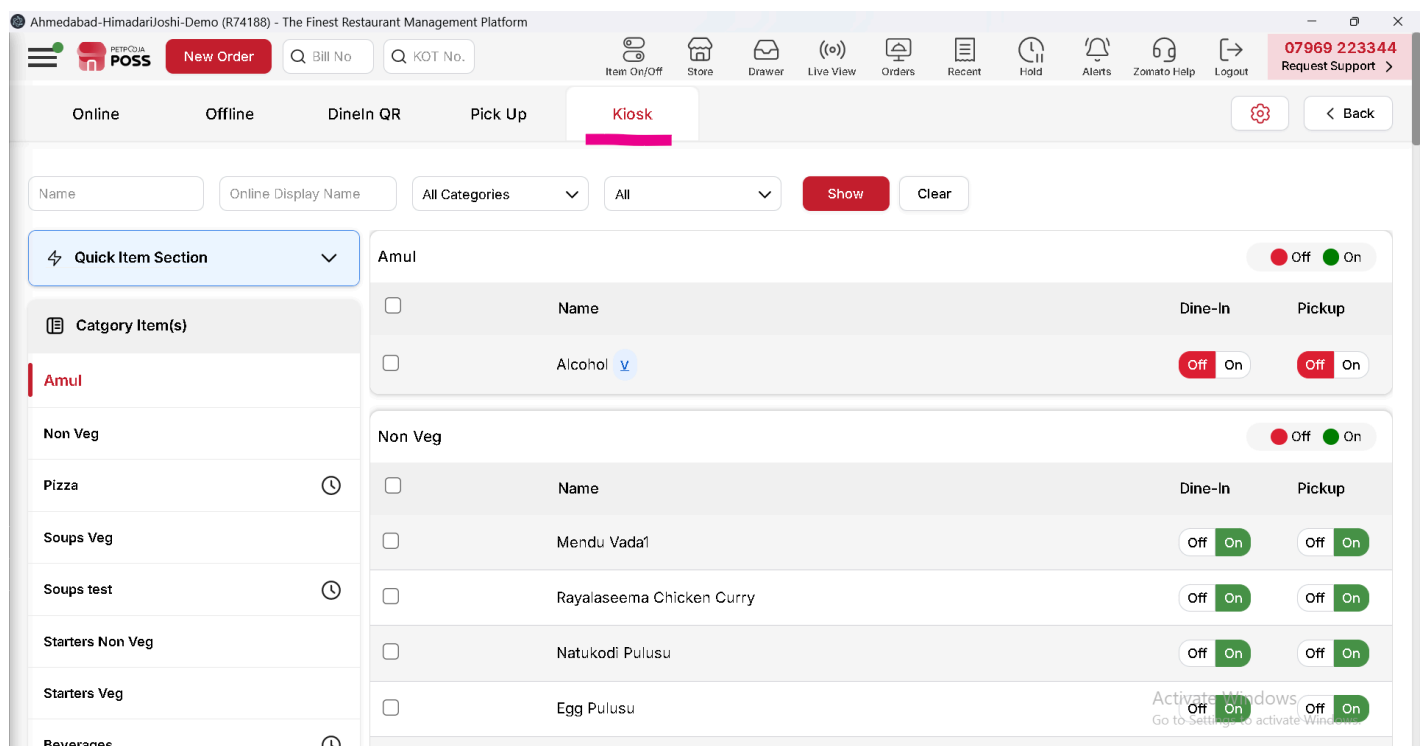

- **Impact:**
 - Improved UI consistency and visual quality

9. Standardized Packing Charge Label (Online Orders)

- Custom packing charge labels are now **restricted for online orders**.
- A **standard label** will be enforced:
 - “**Packaging charge**”
- **Impact:**
 - Ensures consistency and avoids confusion in customer-facing bills.

10. Kiosk Item Availability Control

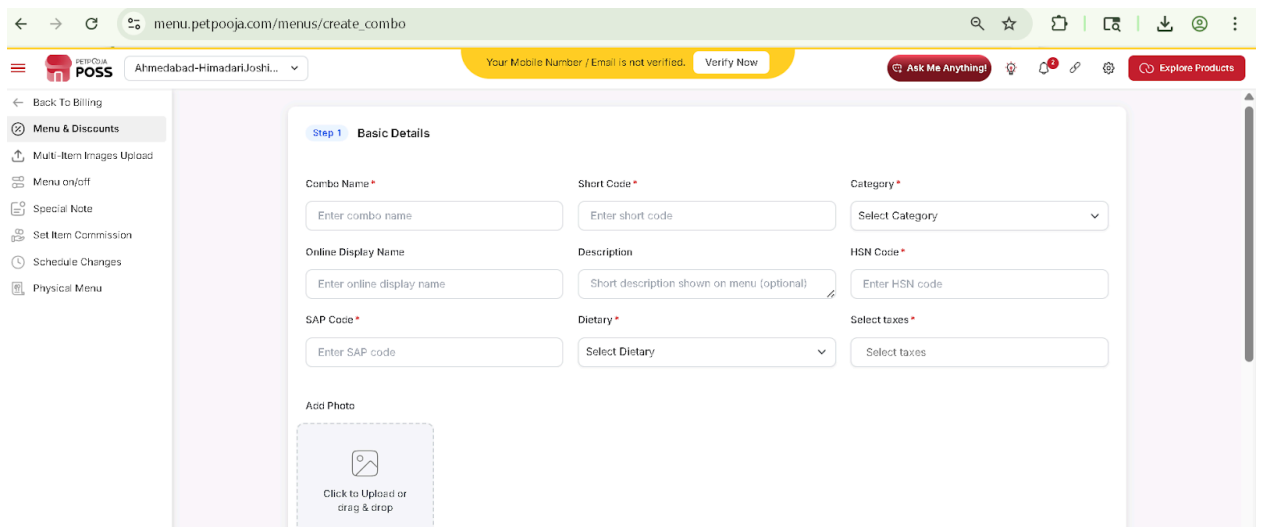

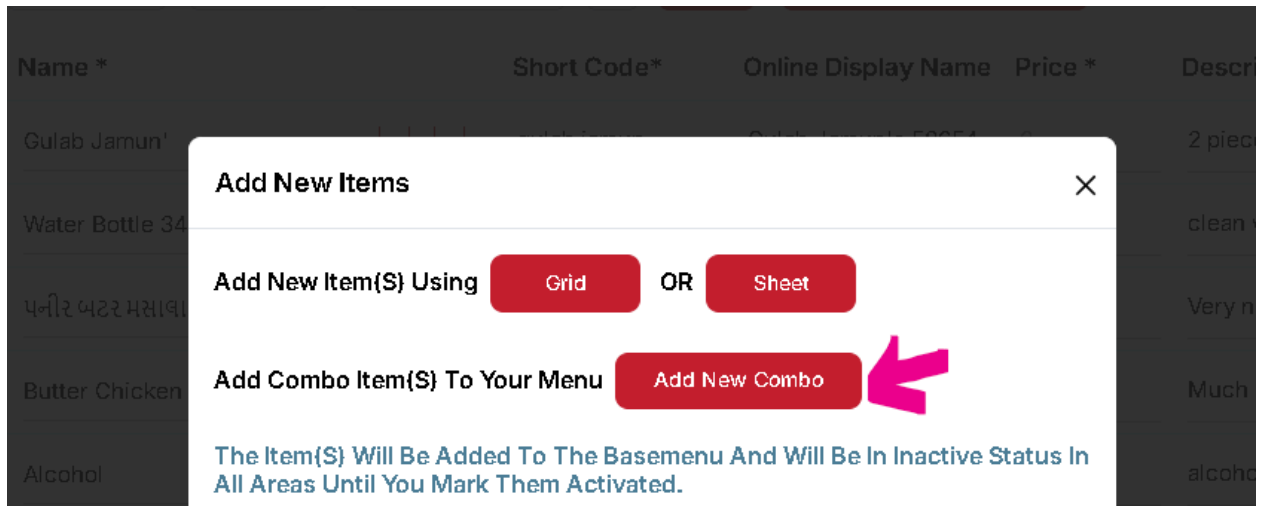

- We’ve introduced a dedicated control in the POS Menu On/Off module to manage item availability specifically for Kiosk.
- You can now instantly mark items as available or unavailable for Kiosk directly from the POS—no separate configuration needed.
- This enables faster updates, reduces operational friction, and ensures your Kiosk menu always reflects real-time availability.

Owners dashboard updates

1. Direct Combo Creation in Menu Management

- Added a **new option to create combo items directly** while adding a new menu item.
- Previously, combos could only be configured via item edit.
- **Impact:**
 - Streamlines combo creation and reduces configuration effort.

2. Complaint & Feedback Actions – Role-Based Access Control

- Introduced a new user right: “Allow Complaint Actions”
 - Location: User Management → Biller → User Rights
- **Permission Behavior:**
 - Read Enabled
 - User can view complaints only

- No action permissions
- Write Enabled
 - Automatically enables Read
 - User can view and take actions (e.g., refunds)
- Read & Write Disabled
 - User cannot view or act on complaints
 - Displays a restricted access message
- **Impact:**
 - Enhances control over sensitive operations like refunds and complaint handling.

3. Auto-Settlement for Aggregator Dine-In Orders

- Introduced auto-settlement support for aggregator dine-in orders.
- **When enabled:**
 - A notification will appear on request bill:
 - “Bill has been generated for table no: <Table ID>”
 - Settlement source will be shown:
 - (e.g., Loop by District, Swiggy Dine-In)
- **Configuration:**
 - Available at Outlet Level
 - Path: Owner Dashboard → Marketplace Settings
 - Default: Disabled
- **Impact:**
 - Improves transparency and automation for aggregator-driven dine-in flows.

Integration updates

1. Common Loyalty Enhancement

- **Update:**
 - Enabled multiple item redemption within a category
 - Added support for multiple categories in a single invoice via API
- **Impact:**
 - More flexible redemption options

- Improved loyalty usage across categories

2. Discount Calculation Fix (Zomato Pay / Wallet)

- **Issue Fixed:**
 - Discount calculation Issue when user did not have after-print discount rights
- **Resolution:**
 - Discount logic corrected to work properly irrespective of user rights

3. Reelo KOT-Based Redemption Fix

- **Issue:**
 - Redemption details were removed when bill was printed from Captain device
- **Fix:**
 - Ensured redemption works correctly regardless of:
 - POS billing
 - Captain-initiated billing
