Release Note v123.0.1

This document will update you on some of the most amazing updates in [Electron POS v123.0.1](#)

POS updates

1. Revamped Live View for Electron POS

- The Electron POS Live View has been redesigned for a cleaner and faster operational experience.
- The updated Live View includes an improved order card structure, better tagging visibility, enhanced filters and search functionality, and a revamped order detail view for smoother navigation during operations.
- These improvements enable faster order visibility, better readability for staff, and a more intuitive live order management experience.

2. Bill & KOT Print Enhancements

- **Update:**
 - Added bold and font size options for KOT headers and footers
 - Restaurant logo can now appear on KOT prints
 - Customer notes and special notes can be printed in bold
- **Impact:**
 - Better readability for kitchen and packaging teams
 - Improved support for multi-kitchen and cloud kitchen setups

3. Dashboard Standardization

- **Update:**
 - New look and feel for dashboard standardization
- **Impact:**

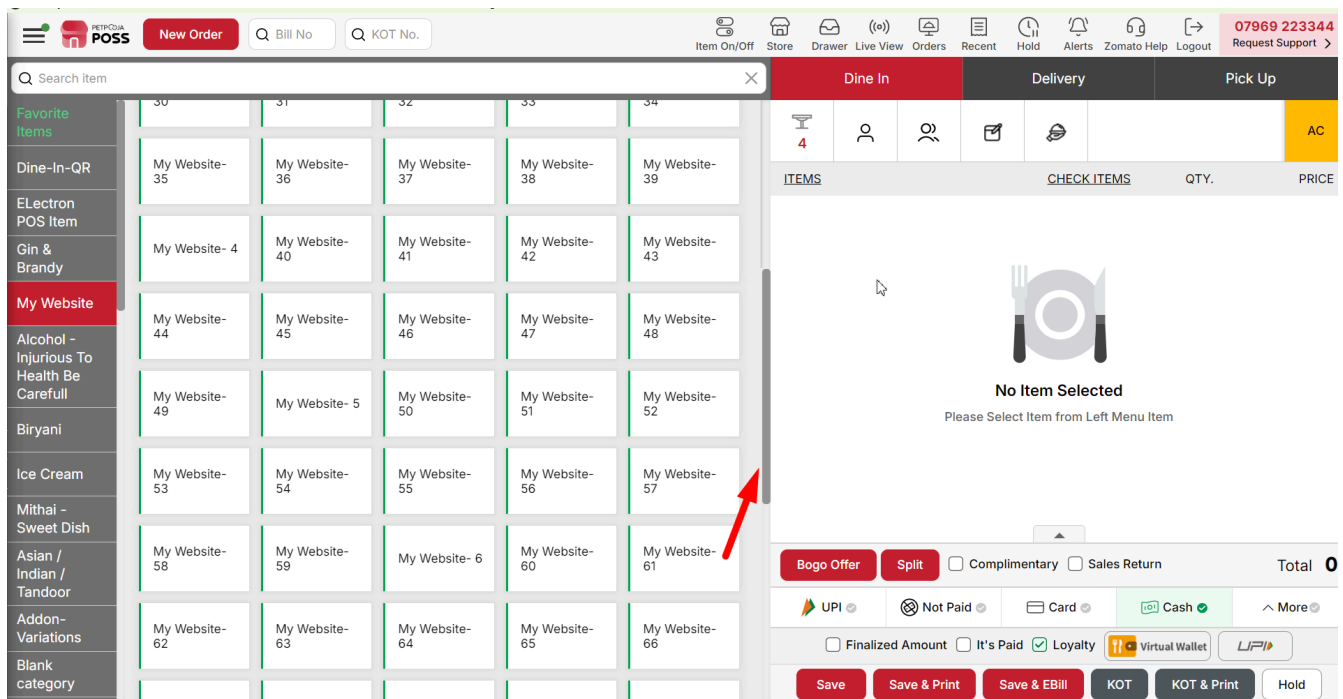

- Consistent and modern dashboard experience

4. Virtual & Numeric Keyboard Improvements

- **Update:**
 - Upgraded virtual keyboard for better stability
 - Keyboard no longer opens unnecessarily in certain fields
 - Improved visibility when keyboard is open
- **Impact:**
 - Smoother typing experience across all POS screens
 - Fewer interruptions during billing
 - Recommendation: Test all keyboard-based screens

5. Scroll Performance & Billing Screen Optimization

- **Update:**
 - Scrolling is now faster and smoother across reports, billing menu, and categories
 - Removed old code that was causing lag issues
- **Impact:**
 - Better performance when handling large reports and long menus
 - No more delays or lag while scrolling

6. UI, Accessibility & Frontend Optimization

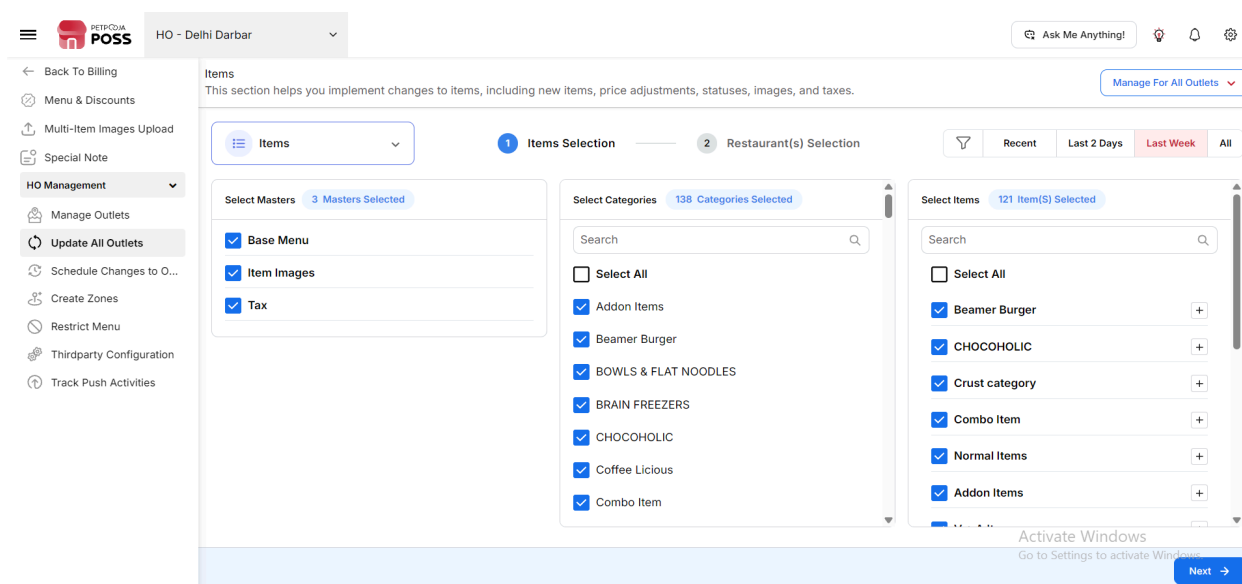

- **Update:**
 - Improved accessibility support for customer display and billing screens
 - Cleaned up outdated styles for a more consistent design
 - Modernized confirmation popups
- **Impact:**
 - Easier to use for all customers
 - Cleaner and more consistent screen designs

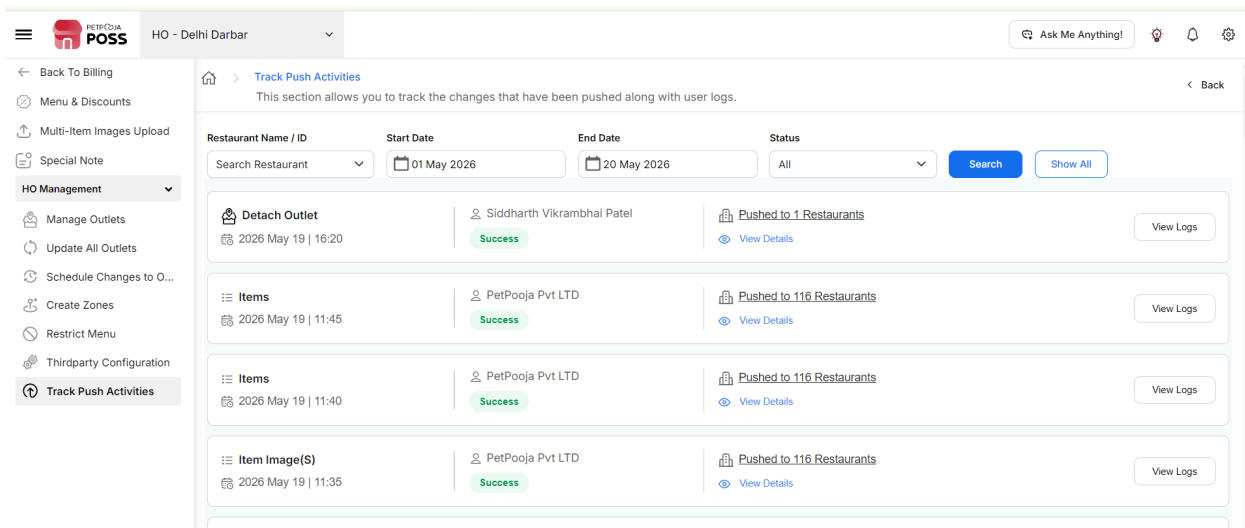

7. POS Header Panel Auto-Close Enhancement

- **Update:**
 - Header panels now close automatically when you click outside or add items to cart
- **Impact:**
 - Less manual clicking while taking orders
 - Faster and smoother billing experience

8. Revamped HO Menu Management with Guided Push Workflow

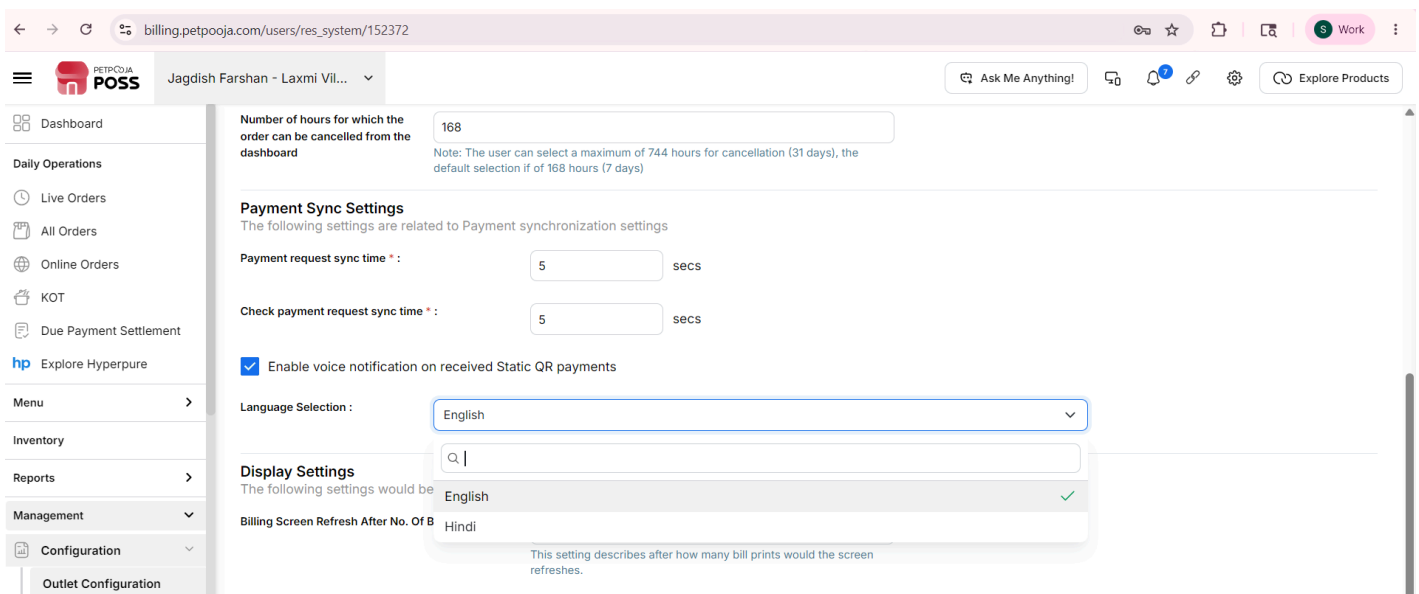

- We've revamped the HO Menu Management module with a guided workflow and a new Pushed Changes Tracking screen for faster, safer, and more transparent outlet menu updates.
- The updated experience now follows a structured step-by-step flow for pushing menu changes, helping users avoid missed selections and operational mistakes. Along with UI improvements, performance optimizations have also been introduced for quicker menu push processing across outlets. A dedicated tracking screen now provides visibility into affected outlets, pushed modules, progress status, and detailed logs for every push operation.
- These enhancements help restaurants achieve faster menu synchronization, reduce operational errors, and improve tracking and auditing of menu pushes.

9. Voice Notifications for Static QR Payments (Sound Box)

- Static QR payment notifications are now more interactive with support for configurable voice announcements.
- A new configuration has been introduced on both Web and POS to enable voice notifications for received Static QR payments. Once enabled, users can select their preferred announcement language between English and Hindi, with English selected by default. To provide a cleaner experience, the existing notification sound will automatically be replaced with the voice announcement when this setting is enabled.
- This enhancement helps staff instantly identify successful payment receipts with clearer and more user-friendly audio confirmations.

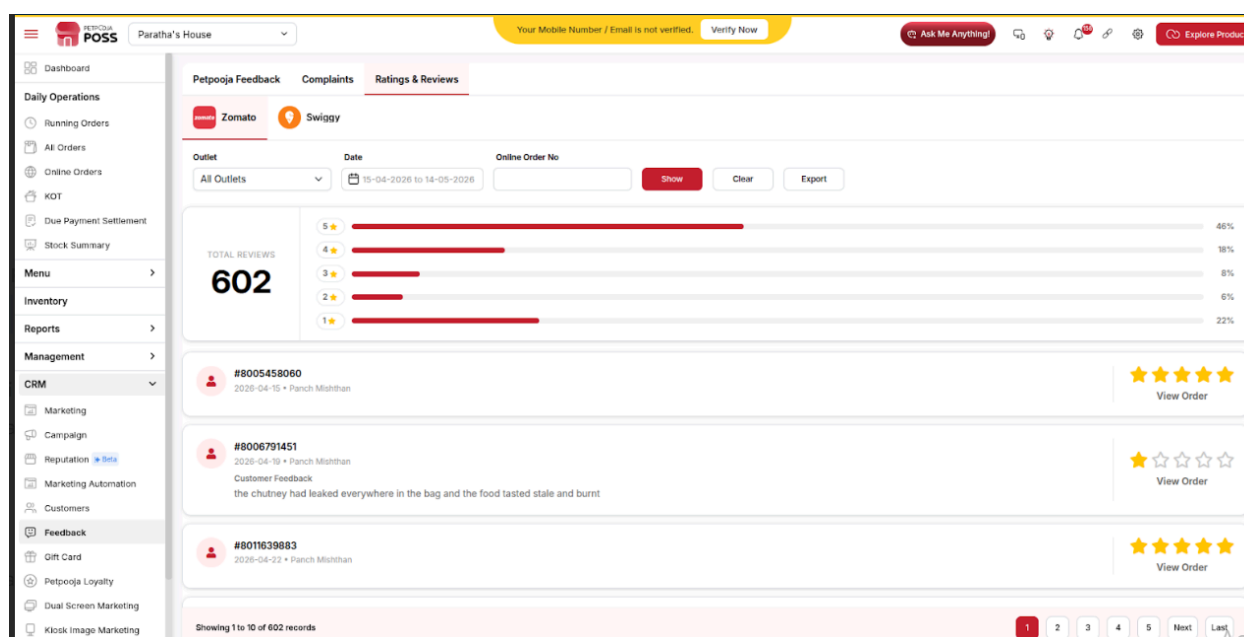

10. Enhancements in Zomato Dine-In (Loop by District)

- Multiple operational enhancements have been introduced in the Zomato Dine-In (Loop by District) integration to improve dine-in efficiency and automation.
- The update includes live support for manual ordering, automatic bill generation, and improved integration automation for smoother workflow management. These changes reduce manual dependency, improve billing speed, and enhance overall dine-in operational reliability.
- The enhancements help restaurants deliver a faster customer experience while enabling more scalable and efficient dine-in order handling.

Owners dashboard updates

1. Revamped Reviews & Ratings Page

- The Reviews & Ratings page has been enhanced to provide a more unified customer feedback management experience.
- With this update, restaurants can now view Zomato reviews along with ratings and also access Swiggy ratings and customer reviews from the same interface. This creates a centralized view of customer sentiment across major aggregators without the need to switch between platforms
- The enhancement improves visibility into brand reputation, simplifies review tracking, and helps restaurants make better operational and service decisions through easier comparison of ratings and customer feedback.

2. Toing Aggregator Bifurcation in Online Orders Dashboard

- The Online Orders Dashboard now includes dedicated bifurcation for Toing orders.
- This enhancement allows restaurants to separately identify, track, and analyze Toing orders within dashboard reporting. It improves aggregator-level reporting accuracy and provides better visibility into online business performance across sales channels.
- The update also simplifies reconciliation and helps restaurants gain clearer operational insights from aggregator-wise order data.

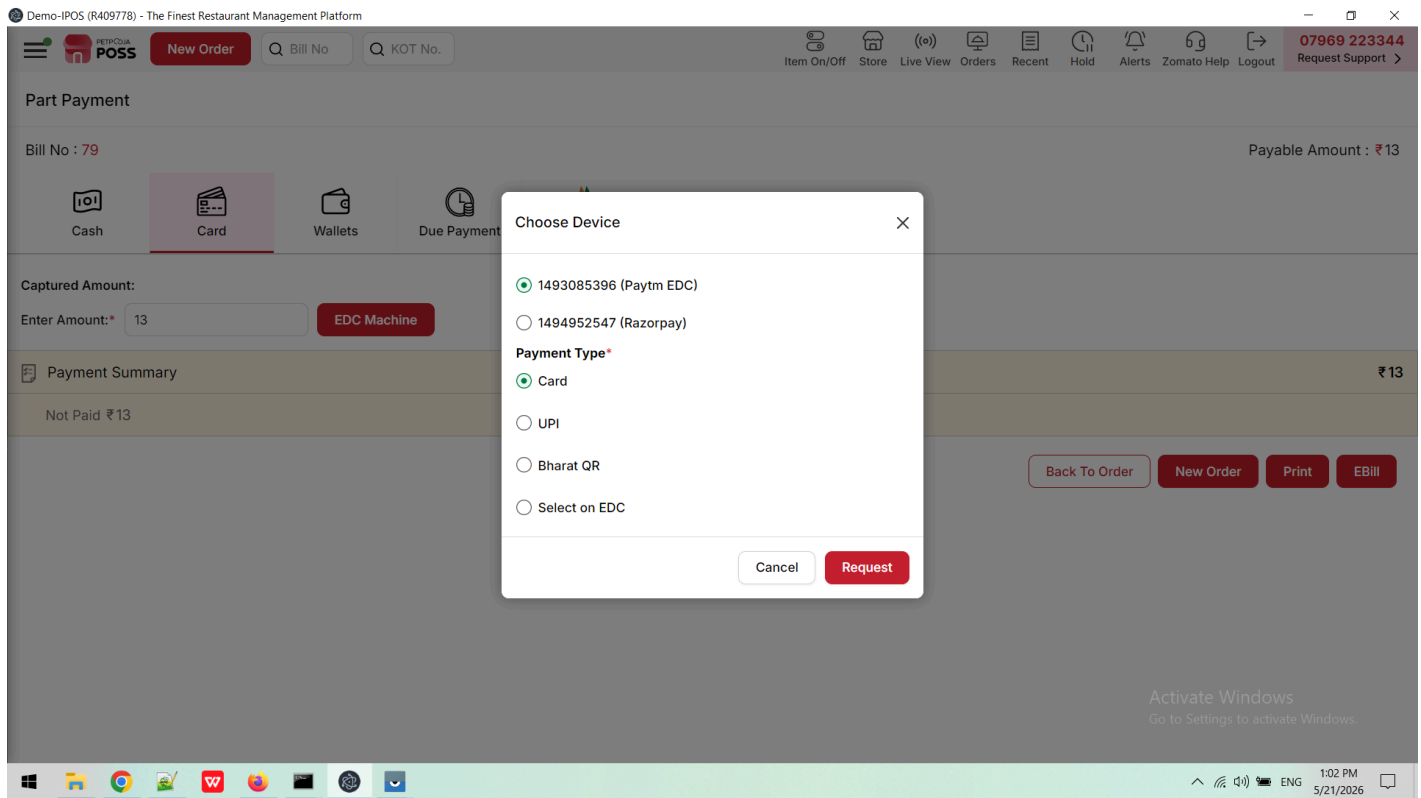

The screenshot displays the POS dashboard interface. On the left, a sidebar lists navigation options including 'Aggregator Center', which is highlighted with a red arrow. The main content area shows 'Online orders' for the date '20th May'. It features a summary card with 'Total Online Sales ₹ 1,160' and 'Orders 4'. Below this is a table with columns: Platforms, Brands, Orders, Revenue, and Action. The table lists various platforms, with 'Toing' highlighted in green. The right sidebar contains a 'Quick Help' section with contact information for Durgesh Rajendra Shukla.

Platforms	Brands	Orders	Revenue	Action
Zomato	8	1	₹ 380	
Swiggy	4	2	₹ 520	
Uengage (ONDC)	0	0	0	
GrowthFalcons	0	0	0	
Dotpe	1	0	₹ 0	
Magicpin	1	0	₹ 0	
Home Website	3	0	₹ 0	
Toing	0	1	₹ 260	
Other	52	0	₹ 0	

Integration updates

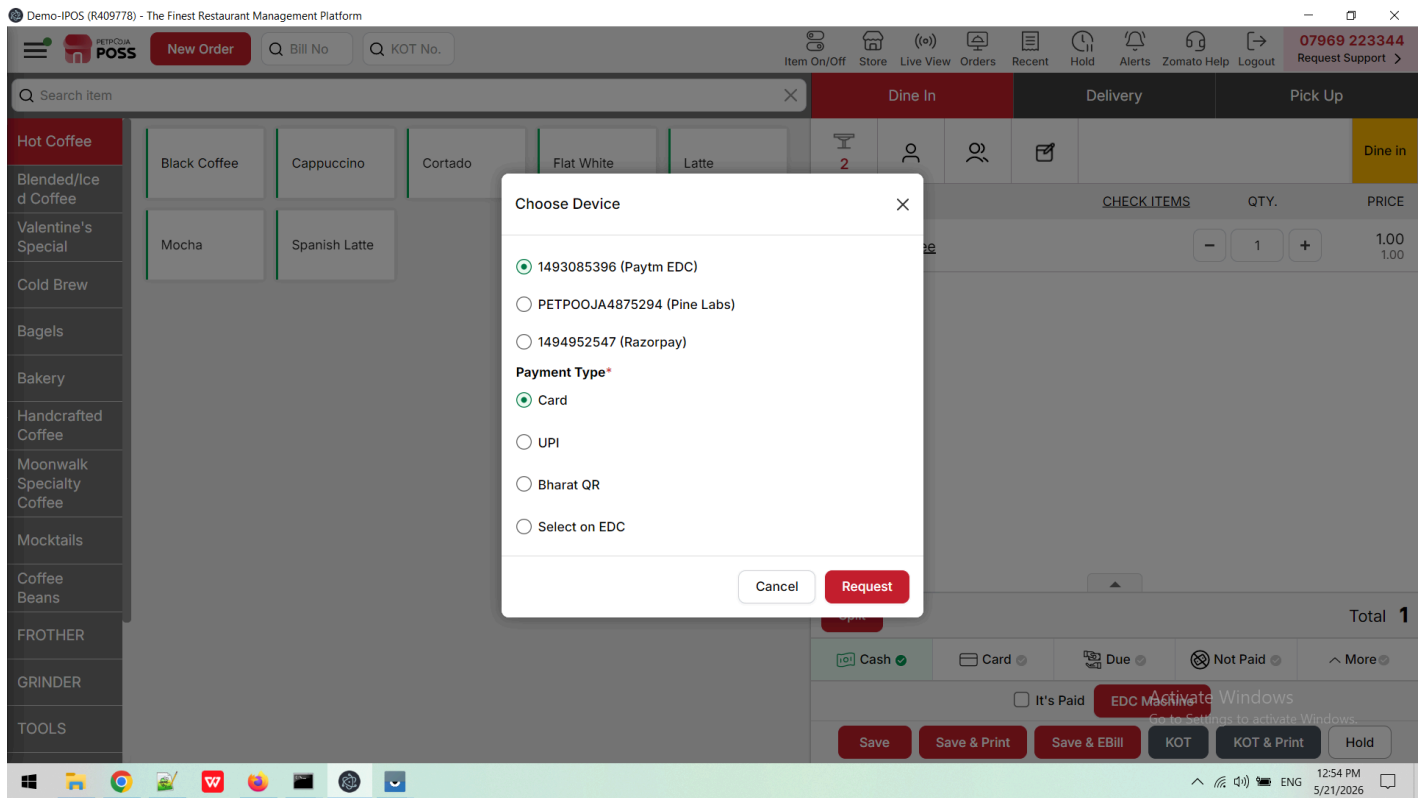

1. EDC Device Selection & Partial Payment Support from POS

- POS now supports improved EDC handling for faster and more flexible payment operations.
- With this update, partial payment support has been added for the POS → EDC intent flow. The POS can now fetch and display all EDC devices configured for an outlet, allowing users to select the preferred device during billing. A default EDC selection option has also been introduced for quicker access and faster payment processing.
- This enhancement provides greater flexibility for outlets using multiple EDC devices and improves billing efficiency during peak operations.

2. BharatQR Support Added in Razorpay EDC Intent Flow

- We've extended the Razorpay EDC intent flow to support BharatQR payments.
- The POS will now pass "BharatQR" as an additional payment mode along with existing Card and UPI options, enabling BharatQR transactions to be initiated directly through the Payment app.
- This enhancement expands digital payment support and enables smoother BharatQR transaction processing within the Razorpay EDC flow.

3. WhatsApp Alerts for Restaurant Riders (Self Delivery Orders)

- Restaurants can now send automated WhatsApp alerts to riders for self-delivery orders.
- This enhancement improves communication between the restaurant and delivery riders by providing timely order notifications directly on WhatsApp. It helps reduce missed deliveries, speeds up dispatch operations, and improves coordination during delivery handling.
- The result is a smoother delivery workflow and a better customer delivery experience.

Delivery Assignment

You have been assigned a new order for delivery. Please find the details below:

 **Order ID:** PP1778152968

 **Customer:** Akshay

 **Phone:** N/A

Items:

1) 1 x Kingfisher Beer

 **Delivery Address:**

Manish 4 Bungalows, Andheri West Mumbai India

 **Google Map Link:**

<https://www.google.com/maps?q=19.12735510000000,72.82754570000000>

4. Loyalty & Redemption Flow Enhancements

- **Update:**

- Loyalty enhancements to improve stability of loyalty integration
- Customer enrollment now happens automatically if customer is not found
- Modern popup design replaces old browser popups

- **Impact:**

- Smoother and more reliable loyalty redemption process
- Better customer onboarding experience
