Release Note v127.0.1

This document will update you on some of the most amazing updates in [Electron POS v127.0.1](#)

POS updates

1. Shift End for Billers

- **Update:**

- Added Shift End feature for billers with configuration in Outlet Configuration.
- Billers can now end their shift independently.
- Added Handover Notes field for remarks (VIP customer, complaints, printer issues).
- Added Shift End Summary report with filters, view/print/reprint, and Export Excel options.

- **Impact:**

- Better shift management and accountability.
- Important information carries forward between shifts.
- Real-time visibility of shift performance.

2. Hierarchy-based Discount Approval

- **Update:**
 - Introduced hierarchy-based OTP approval for discounts based on percentage/Fixed.
 - Set Discounts hierarchy - Example - upto 25% → OTP to L1, 25-50% → OTP to L2, Above 50% → OTP to L3.
 - Additional levels (L4, L5,etc) can be added as needed.
 - Discount applied only after successful OTP verification.
- **Impact:**
 - Better control over high-value discounts.
 - Multi-level approval prevents unauthorized discounts.
 - Flexible configuration as per business needs.

3. Auto bill generation works without printer

- **Affects:**
 - Auto Bill Generation
- **What Changed:**
 - We've removed the requirement to configure a printer before auto bill generation can run.
 - Your bills will now generate automatically regardless of printer setup, making the billing process more reliable and eliminating an unnecessary configuration step.
- **Impact:**
 - Auto bills generate smoothly even without printer configuration
 - Simpler setup—one less requirement to configure upfront

4. Full Settlement access now permission-controlled

- **Affects:**
 - Due Payment screen
- **What Changed:**
 - The Full Settlement button in the Due Payment screen is now controlled by Biller Rights permissions.
 - Only users with the appropriate access level can view and use this button.
 - This prevents unauthorized users from performing settlement operations and protects your account from potential fraud.
- **Impact:**
 - Only authorized team members can access settlement features—reducing fraud risk
 - Tighter control over who can settle payments in your business

5. E-bills for dine-in QR and third-party orders

- **Affects:**
 - Dine-in QR and Third-Party Order Settlement
- **What Changed:**
 - We've fixed an issue preventing e-bills from being sent when orders are settled through dine-in QR codes or third-party integrations.
 - Customers will now automatically receive their bills at order completion.
 - This eliminates the need for manual bill delivery through these channels.
- **Impact:**
 - Customers receive e-bills automatically when settling orders via dine-in QR or third-party integrations
 - Eliminates manual follow-up for bill delivery

6. Accept cash on self-delivery orders

- **Affects:**
 - Bill & Order Information screens
- **What Changed:**
 - You can now accept cash on delivery (COD) payments for self-delivery orders placed through Swiggy.
 - The amount customers owe will be clearly displayed on the printed bill and visible in the order information screen, making it easy for your delivery staff to know exactly how much cash to collect.
- **Impact:**
 - Adds payment flexibility for self-delivery customers beyond prepaid only
 - Ensures staff quickly see exact cash collection amounts

7. Expenses Now Synced for Day End

- **Affects:**
 - Day End and Expense Management
- **What Changed:**
 - Expense entries you log in your Expense module are now automatically synced and appear in your Day End screen.
 - You can view, review, and process all synced expenses directly during your daily closing, keeping everything organized in one workflow.
- **Impact:**
 - Streamlines daily closing by centralizing all expenses in one workflow.
 - Ensures no expenses are missed during Day End reconciliation.

8. Customer Phone Number Lock After Loyalty Redemption

- **Update:**

- Customer phone number and details cannot be edited after loyalty redemption is completed.
- Applies to all loyalty providers.
- Fields locked: Phone, Name, Email, Address, Locality, GST, Customer info popup.

- **Impact:**

- Prevents misuse of loyalty points.
- Ensures points are deducted from the correct customer.
- Maintains accurate loyalty transaction records.

9. Part Payment – No Restrictions During Initial Payment

- **Update:**

- Billers can select payment type freely during initial Part Payment.
- Restrictions applied for save& print and Settlement.
- Auto bill number generation during Part Payment is not considered as Save event.

- **Impact:**

- Uninterrupted Part Payment flow.
- Consistent experience for billers.

10. Modern and Consistent Popups

- **Update:**

- All alerts and confirm boxes now have a clean, modern look.
- No more grey browser-style popups.
- No screen flickering during popups.
- 175 default alerts/confirmations converted to custom message boxes.

- **Impact:**

- Professional and consistent user experience.
- Smoother operations with no interruptions.
- User input remains safe when popup is already open.

11. Printer Settings – Easier Navigation

- **Update:**

- Clicking Bill/KOT Print now directly opens Printer Listing.
- Global printer settings available in a separate tab.

- **Impact:**

- Clearer distinction between global and individual printer settings.

- Faster access to printer configurations.
- Reduced confusion.

12. Clearer Settlement Alert Popup

- **Update:**
 - Changed "Ok" / "Close" to "Yes" / "No" in settlement mismatch popup.
 - Applies to all wallet payments.
- **Impact:**
 - Clearer decision-making for billers.
 - Reduces confusion during settlement.

13. Fixed tender type on loop settlements

- **Affects:**
 - Billing View > Settlements
- **What Changed:**
 - We've fixed an issue where settlements received from the loop system were saving the wrong tender type.
 - When a biller was in the Billing view and a settlement arrived from the loop, the system now correctly saves the actual tender from that settlement instead of defaulting to the configured default tender like CASH.
- **Impact:**
 - Tender records now accurately reflect the payment method from loop settlements.
 - Financial reconciliation and settlement reporting are more reliable.

14. Print dynamic QR for outstanding amount

- **Affects:**
 - Bill Print
- **What Changed:**
 - When you partially pay and print a bill, a dynamic QR code now appears on the bill for the outstanding amount.
 - Customers can scan it to complete the remaining payment, which automatically updates the order—provided your UPI QR service is enabled.
- **Impact:**
 - Lets customers settle outstanding amounts faster by scanning—no separate payment entry needed.
 - Improves payment completion rates and reduces manual collection effort on partial bills.

15. EDC Payments Launch Directly from POS

- **Affects:**
 - Advance Order Payments & Due Payments
- **What Changed:**
 - We've integrated EDC payment processing into your POS.
 - When collecting advance order payments or outstanding dues, you can now tap a button to launch your EDC payment app, process card transactions, and return to the POS to complete the order—all without leaving the application.
- **Impact:**
 - Complete advance and due payments without switching apps.
 - Speed up payment collection with seamless EDC integration.

Owners dashboard updates

1. Copy Users to Multiple Outlets

- **Update:**
 - Added "Copy Users to Outlets" option to copy Biller, Captain, Waiter, Delivery Boy from one outlet to multiple outlets at once.
 - Prevents duplicate user creation if same details exists.
 - Copied users are independent per outlet.
- **Impact:**
 - Saves time when setting up users for chain outlets.
 - Reduces manual errors.
 - Faster rollout for new outlets.

2. More Reasons for Complimentary Billing

- **Update:**
 - Expanded from 4 to 25 custom reasons.
 - New reasons: Director, Executive Chef Trial, Spoilage (Food/Bakery/Alcoholic), Operations Trial, and more.
 - Add or remove reasons as needed.
 - Applied to Order Complimentary, Order Cancel, Order Edit, Order Sales Return, KOT Cancel, and more.
- **Impact:**

- Better tracking of complimentary orders.
- Clear categorization of spoilage and trial expenses.
- Flexibility to add outlet-specific reasons.

3. Customer Details Change Log After Bill Print

- **Update:**

- All customer detail changes (mobile, name, email, GST) made after bill print are now logged.
- New report available: "After Print Customer Details Modification".
- View who changed what, when, and from which device.

- **Impact:**

- Complete audit trail for customer changes.
- Prevents loyalty misuse.
- Better accountability and transparency.

4. Maximum Discount Cap for Loyalty Rewards

- **Update:**

- Loyalty providers can now set a maximum discount limit per reward.
- Example: 20% off but max ₹100 discount.

- **Impact:**

- Prevents excessive discounts on high-value orders.
- Better cost control for restaurants.
- Flexible loyalty program management.

5. Copy Menus Between Locations

- **Affects:**

- Menu Management

- **What Changed:**

- You can now replicate your entire menu setup from one location to another.
- This includes items, categories, grouping, tax settings, discounts, areas, and add-ons — all copied in one go. Access the replication feature in Menu Management.

- **Impact:**

- Save time by copying complex menu setups instead of manually recreating them for each location.
- Ensure consistent menu configuration and pricing across all your restaurant locations.

- **Update:**
 - Expanded from 4 to 25 custom reasons.

6. Control addons and variations in dine-in menus

- **Affects:**
 - Dine-In Menu QR & Integrations
- **What Changed:**
 - You can now enable or disable addons and variations in your dine-in menu QR codes and integrations, in addition to individual items.
 - This works across both your POS system and customer-facing web ordering, giving you finer control over what your customers can select.
- **Impact:**
 - Manage which addons and variations customers can order
 - Control menu availability consistently across POS and web

7. Order Preferences with four distinct types

- **Affects:**
 - Menu Management > Order Preferences
- **What Changed:**
 - We've upgraded Menu Management by renaming Special Notes to Order Preferences and reorganizing it into four distinct sections
 - Items Notes
 - Cooking Preferences
 - Order Notes
 - Allergens
 - Each section includes predefined options you can enable or disable, plus the ability to add custom preferences and reorder them to match your restaurant's workflow.
- **Impact:**
 - Organized structure cuts setup time and confusion
 - Dedicated allergen section ensures food safety compliance

Integration updates

1. Reelo Redemption – Items Must Be in Cart

- **Update:**
 - Items must already be in cart before applying Reelo redemption.
 - System no longer auto-adds free items.
 - Error message shown if applicable item is not in cart.
- **Impact:**
 - More accurate redemption process.
 - Biller has full control over which items get discount.
 - Prevents unwanted free items.

2. EDC Void Transactions Now Require Confirmation

- **Affects:**
 - EDC Payment Integration > Order Cancellation
- **What Changed:**
 - The POS now displays a confirmation prompt when an EDC payment is voided, asking whether to cancel the associated order.
 - You can choose Yes to cancel automatically or No to leave it unchanged.
 - This puts you in control of how each payment void is handled instead of risking unwanted order cancellations.
- **Impact:**
 - Prevents unwanted order cancellations when EDC payment voids occur.
 - Resolves payment issues immediately with clear visibility and action prompts.

3. QR Payments Now Integrated with Finance

- **Affects:**
 - QR Payments
- **What Changed:**
 - QR code payment processing is now managed through the Finance system.
 - Payments are processed in real-time and automatically matched to invoices, eliminating manual reconciliation work and ensuring your billing records stay accurate without extra effort required.
- **Impact:**

- Real-time payment processing with automatic invoice matching
- Eliminates manual payment reconciliation

-

4. Loyalty & Redemption Flow Enhancements

- **Update:**

- Loyalty enhancements to improve stability of loyalty integration
- Customer enrollment now happens automatically if customer is not found
- Modern popup design replaces old browser popups

- **Impact:**

- Smoother and more reliable loyalty redemption process
- Better customer onboarding experience
